Direction:

- 1- Karoon cattle feed must be stored in a dry and free of humid and heat place. The shelf life of the cattle feed is one year.
 - 2- Before feeding the cattle with Karoon cattle feed, moisturize it by spraying water on it to be tender then it can be fed on the cattle. It not only increases the appetite of the cattle, but it would be effective on absorption of this feed in the cattle digestive system.
 - 3- For more efficiency, this cattle feed can be used with a 15% concentrate or with other products such as bran, barley flour, corn or with oil cake of Soya and cottonseed in Highly nutrient concentrate for the ruminants.
 - 4- Karoon cattle feed can be fed to the cattles with mixture of other nutrients using 3-4% salt powder and 1% bone powder or calcium phosphate with vitamin supplements.
 - 5- This cattle feed is used in concentrate plants as agriculture waste matters.
 - 6- Karoon cattle feed is the best substitution for provender to straw. Az it is enriched highly with molasses it has individually higher nutrient value to dried provender.
 - 7- Fore the most efficiency of this feed and for more absorption in the cattle's body, it is better to add some provender such as clover, hay and Sudan grass to the cattle's daily feed.
- At the end, it is recommended watering the cattle sufficient, fresh and freeing from pollution water daily.
